
OFFLINE PHASE
fit from recorded behaviour; regularise conservatively
DEPLOYMENT PHASE
frozen models; repeat at each control step
Offline dataset $\mathcal{D}$
$(o, a, r, o', a'_{\mathcal{D}}, d)$
standardise features
fixed data —
no online exploration
Conservative behaviour-return fitting
SARSA + $\mathcal{R}_{\mathrm{CQL}}$
Conservative critic
Learned value landscape
frozen after fitting
BC + uniform conservative samples
Conditional behavior model
fit once; freeze
Frozen models
at deployment
